Teaching Janet How to Cook.

(By Mabel Jane Molwalters.)

Janet leaned over so Billy could hear her above the roar of the Shafts.

Limited, that was taking them to their rooms in the northern part of the state.

"William," she said impressively, "don't you dare talk in a flowered room, or you'll be made to do domestic service." If you do I'll do something awful to you."

"I'm too young and fat to dig," said Billy with a grin, "so I'll promise to keep my mouth shut." Janet was proud of your profession."

"I am, but just before we were married you know I visited the flowered room, and just as I was about to leave, I told him I had loved the advice and kindness. At supper he told Professor McIntyre and Billy, "I promised to give them a course in domestic science and they all paid to keep it a secret. I told them for a fact that you'll have to lay in a supply of peplos, William, for there are forty members in that club."

ASH IS NOT GENUINE TEST

Merely Shows That Cigar Is Well Made, Not That Its Quality Is of the Highest.

Can the quality of a cigar be told by the ash? To a certain extent it can. Many smokers take a great delight in seeing how long the ash will stay on. It is often possible to smoke a big Havana cigar half or three-quarters of the way through with the ash intact.

But what most cigar smokers fail to realize is that this is the test of a well-manufactured cigar and not necessarily of the tobacco in it. It depends upon the length and neat arrangement of the filling leaf. A well-made compact cigar will burn just as well as a long one with just another foot.

But it does not follow that the tobacco is better, a tobacco expert writes.

A surer test is when the ash is flicked off. The glowing point should be sharp. The sharper the point the better the cigar.

As regards the ash, it is a common fallacy that white ash is a sign of a fine, and dark ash the sign of an inferior, leaf. The real truth is that the color depends upon the strength of the smoke.

A very mild and cheap cigar will give a pure white ash. The finest Havana of ripe strength produces a blackish ash. It does not follow that a cigar which burns imperfectly is bad tobacco. You may have lighted it badly or it may be clumsy made. Brooklyn Eagle.

ELOQUENT TRIBUTE TO TREES

Written Beautifully Expresses What Every Lover of Nature Must Have at Some Time Felt.

Trees are the arms of Mother Earth lifted up in worship of the makers; where there are mighty oaks, there is the shelter of man, heat and light, they furnish the roof above the shade about us, and the nesting places of love and song. They call children out to play; they entice sweethearts into leafy coverlets to seal their vows with fond caresses; they console and gratefully reward old age. They are the fittest ornaments of wealth and the inalienable possessions of the poor, who can afford them. They are the friends of all, and the bright lights of their forms which were thought to resemble the shape and luster of the sun and suns were taken to be the forms in which the sun god appeared.

Scarabs were cut in stones and employed as seals and amulets. They were bored through their length so that they could be strung like beads. After the coming of the Babylonians with other races, especially the Chinese, came the beginning of these gods in accordance with their own beliefs. Three of the most ancient period, such as are found on nummuses, are inscribed with the names of the gods held in highest veneration, Thutmosis III, Hammurabi and Amenophis III, and frequently with some hieroglyphic symbol. The larger of them have some short religious or historic inscription on their under sides.

Just then they were interrupted by Grandma Wilson, who said, "I saw you two children were just eating your supper and I brought a few doughnuts for you. Do you suppose people would be so wonderful and 'lovely' if they knew about my dark past?" demanded Janet. "You can just give me a look, and I'll tell you what I have done. I have a son, and we are going to be a couple of numbers next short time."

"Then Mrs. Barton said, 'oh, let's not talk about me. I'm a young and inexperienced, and the subject next time is efficiency in the kitchen. Wait until our next literary program, and ask me to read a poem or something like that.'
